**Summary of the Cultural Resources Analysis Completed for Reroute Locations  
Dakota Access Pipeline Project  
North Dakota PSC  
March 28, 2016**

Dakota Access, LLC has completed Class II/III cultural resources surveys for the proposed Dakota Access Pipeline Project (Project) across affected tracts. This document provides a summary of the Class II/III methodology and results of surveys completed along the Project route and datasets utilized to complete the PSC reroute analysis of exclusion and avoidance areas (Table 1).

Cultural resources investigation conducted in support of this project began with a Class I search for previously reported archaeological sites and manuscript files focused on a 2-mile-wide (3.2 km) area centered on the 400-foot-wide environmental survey corridor. The Class I search was conducted at the State Historical Society of North Dakota (SHSND) office in Bismarck, North Dakota. This work was followed by a Class II/III cultural resources inventory across all portions of the Project where landowner access was voluntarily provided. All field work was conducted under the direct supervision of the Principal Investigators permitted by the SHSND, and in compliance with the North Dakota State Historic Preservation Office (SHPO) Guidelines Manual for Cultural Resources Inventory Projects (SHSND, 2012). To date, a total of three Class II/III inventory report volumes have been prepared and submitted to the SHSND that detail the results of the Class II/III survey investigations to date (Landt et al 2016; Lange Mueller et al 2015a; Lange Mueller et al 2015b). Salient information regarding background review studies, environmental and cultural setting, methods, results and recommendations may be referenced in these report volumes. Extracted mapping exhibits are also provided that detail survey coverage for each location as presented in the submitted Class II/III report volumes.

<b>Reroute ID</b>	<b>County</b>	<b>Report Volume</b>	<b>Survey Status</b>	<b>Comments</b>
20	Mountrail	Vol. II/III	Survey Complete	Negative
22	Mountrail	Vol. II/III	Survey Complete	Negative
24	Williams	Vol. II/III	Survey Complete	Negative
25	Williams	Vol. III	Survey Complete	All cultural resources avoided by March 2016 workspace
26	Williams	Vol. I/II	Survey Complete	Negative
28	Williams	Vol. I/II	Survey Complete	Negative
31	Williams	Vol. III	Survey Complete	All cultural resources avoided by March 2016 workspace
34	Williams	Vol. II/III	Survey Complete	All cultural resources avoided by March 2016 workspace
36	Williams	Vol. I/II	Survey Complete	All cultural resources avoided by March 2016 workspace

**Table 1**

<b>Reroute ID</b>	<b>County</b>	<b>Report Volume</b>	<b>Survey Status</b>	<b>Comments</b>
42	McKenzie	Vol. I/II	Survey Complete	Negative
44	McKenzie	Vol. II/III	Survey Complete	All cultural resources avoided by March 2016 workspace
46	McKenzie	Vol. II	Survey Complete	All cultural resources avoided by March 2016 workspace
50	Dunn	Vol. II/III	Survey Complete	All cultural resources avoided by March 2016 workspace
52	Dunn	Vol. II/III	Survey Complete	One cultural resource avoided; an additional cultural site is located within both December 2014 and March 2016 workspaces, however impacts are minimized through reduction in workspace along March 2016 route. Site is included in the DAPL Cultural Mitigation Plan approved by the ND SHPO.
53	Dunn	Vol. II/III	Survey Complete	One cultural resource avoided; an additional cultural site is located within both December 2014 and March 2016 workspaces, however impacts are minimized through reduction in workspace along March 2016 route. Site is included in the DAPL Cultural Mitigation Plan approved by the ND SHPO.
